

Welcome to Veberod Open Studio!

Effective February 9, 2024

Normal Hours: Fridays, 10:30 – 4:30 when Harry is available.

COST: Full day - \$50, One hour - \$20

Students will be given a voucher with each class good for one free day of open studio.

Open Studio is an opportunity for students to **practice skills learned in class**. We have found that repetitive use of a new skill greatly increases student's confidence and can improve their results in future classes!

Open Studio is NOT meant to teach new skills, but to improve proficiency by working on projects using your current skill set.

Benches and basic tools are provided.

Torches and consumables like sawblades, flux, butane, drill bits, polishing wheels and sandpaper must be purchased.

Rolling mill and Flexshafts are available only after approval by Camille. Permission to use the flexshafts will normally require taking a Veberod class that features flexshaft use. Permission to use the rolling mill will require demonstration and initial supervision.

Buffing arbor, torches and kiln are not available for use
